RADIAL APPROACH™

RADIAL APPROACH™

- prepare
- access
- diagnose
- intervene
- hemostasis
- integrate

Merit Medical offers an integrated suite of products designed specifically for the radial approach to optimize the **EFFICIENCY** of radial procedures. We are able to provide products to meet your clinical needs with superior performance and reliable quality. Merit listens closely to the needs of our customers, to provide the products they need to help them deliver efficient, patient-focused, and cost-effective **CARE**.

Rad Board®
Radial Arm Board

prepare

Rad Rest®
Arm Cushion

Drape Armour®
Positional Protection Shield

Radial Drape

➤ prepare efficiently and safely

Merit Medical offers a complete line of radial products designed to address the ergonomic needs of the patient and the physician. In addition, the radial arm board provides **PROTECTION** from scatter radiation to enhance the safety of clinical staff.¹ Because preparation for radial cases is different from that for femoral, Merit Medical can integrate all of the products needed for radial **PREPARATION** into a procedure pack to meet your laboratory's specific requirements.

access

Prelude®
Radial Sheath Introducer

Merit Advance®
Angiographic Needle

Mandrel Guide Wire

Spring Coiled Guide Wire

start with quality

One of the most important elements of the radial approach is access of the radial artery. Achieve quick and **EFFECTIVE** access with Merit's Advance needles and radial sheath introducers with excellent transitions for **SMOOTH** insertions while minimizing the potential for spasm. Merit also offers needle and wire **OPTIONS** specifically designed for access via the radial artery.

diagnose

Performa Ultimate™
Angiographic Catheter

InQwire®
Diagnostic Guide Wire

Merit Laureate®
Hydrophilic Guide Wire

MIV®
Radial Ventriculogram Catheter

diagnose

➤ navigate with confidence

NAVIGATION to the coronary arteries via the radial artery may be different than the femoral artery approach. For this reason, Merit Medical offers small J-tip guide wires and hydrophilic diagnostic guide wires in a variety of **LENGTHS**. Our full line of diagnostic catheters include specific radial **SHAPES** designed for stability, handling and control. The innovative MIV radial catheter eases access for ventriculograms from the radial approach.

intervene

ConcierGE®
Guiding Catheter

basixTOUCH™
Inflation Device

ASAPLP™
Low Profile
Aspiration Catheter

ASAP®
Aspiration Catheter

Ostial PRO®
Stent Positioning System

intervene

➤ expand your options

For coronary interventions, Merit Medical has product options to support both radial and femoral procedures. Our **GUIDING** catheters include radial shapes with greater kink resistance and torque response. Merit's unique stent **POSITIONING** system enables more precise stent implantation in aorto-ostial lesions. Our latest **INFLATION** device offers greater capacity and one-handed preparation. Merit's **ASPIRATION** catheter has one of the largest lumens on the market and is available in a low profile option.

hemostasis

Safeguard®
Pressure Assisted Device

Safeguard Radial™
Compression Device

➤ provide patent hemostasis

Merit Medical's radial compression device maintains **COMFORTABLE**, convenient hemostasis following radial procedures. The Safeguard Radial provides **PATENT HEMOSTASIS** with clear **VISIBILITY** to the puncture site, as well as easy access to the distal pulse. The same **COMPRESSION** technology is also applied to a femoral hemostasis device for those cases where a femoral access site is also needed.

➤ customize for efficiency

The radial approach requires **INTEGRATED** procedure packs and trays that anticipate your workflow to **OPTIMIZE** the needs of your laboratories. An integrated procedure pack from Merit Medical can be built with your preferred radial and interventional products and accessories, **ORGANIZED** in the order that they are needed. Merit Medical can help you take advantage of radial access with products that support the benefits of the radial approach.
